

AMPLIFON GETS, FOR THE FIRST TIME, A 'B SCORE' IN THE CLIMATE CHANGE CDP FOR CLIMATE-CONSCIOUS COMPANIES

Milan, 6 February 2024 – **Amplifon**, the world leader in hearing care services and solutions, obtained for the first time a **'Score B'** (Full Management) in the **CDP (Carbon Disclosure Project) Climate Change 2023** questionnaire dedicated to the most climate-conscious companies.

The ranking groups companies that stand out for their commitment and transparency in combating climate change. In 2023, more than 23,000 companies worldwide participated in the questionnaire. CDP is a non-profit charitable organisation that manages the global disclosure system for investors, companies, cities, states, and regions to coordinate their environmental impact.

This recognition confirms the Group's active role in improving performance and transparency on **environmental issues**. It also reflected in the **ESG objectives** of Amplifon's Sustainability Plan and formalisation of the commitment to define **science-based decarbonisation targets** (in line with SBTi, Science-Based Target initiative) for the company's climate strategy.

Amplifon

Amplifon is the world's leading group in hearing care services and solutions. Its goal is to allow people with hearing loss to rediscover all the emotions of sound, offering innovative and personalized products and services to guarantee the best solution for each customer. Founded in Milan in 1950, the Group, with annual revenues of over 2 billion euros, operates through a network of over 9,500 points of sale and 20,000 people in 26 countries and 5 continents.
